

DAT257 Social Contract

Group Yavin

August 2022

Project goal

The overall goal of the project is to deliver the maximum amount of customer value through our chosen product while also strengthening the teams knowledge and skills within agile methodologies. In order to accomplish this goal, we have formulated a set of guiding rules that aim to facilitate quality communication and work structure.

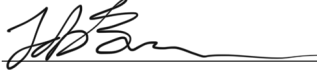

Project work rules

- Everyone on the team has an equal voice, any disagreements that can not be solved by converse will therefore be handled with a vote.
- No planned/obligatory work scheduled on weekends (sat, sun). [Can only be mantaded in severe cases.]
- There is no fixed preference on remote vs. on-site work, everyone agrees to adapt to what fits best för the specific task and setting in question.
- Always be sufficently prepared before scheduled meetings, this is vital for them to be efficient.
- Always show up on time.
- The quality of deliverables is a joint responsibility no matter who did the work on a a specific detail.
- Every member is responsible of keeping the task-managment system up-dated.

The members below hereby agree to the above described rules. The agreement is valid upuntil the completion of the course DAT257, specifically 2022-08-29 to 2022-10-30.
